2026 Year in Review

FOCUSED ON THE "U"

The Voice of Utility Contractors Since 1964

ADVOCACY

Fighting for Laws & Regulations

NUCA is working with Congress and the State to increase federal funding for utility construction, expand Private Activity Bonds, improve mental health assistance, and make work zones safer - all from the utility contractor's perspective.

NETWORKING

Bringing the Industry Together

Productive, business driven networking events are held quarterly throughout the State, allowing new relationships to be made between vendors and contractors and existing ones strengthened.

BENEFITS

Saving Your Company Money

Programs designed only for NUCA NJ members continue to be rolled out, providing savings for insurance, project tracking and billing, shipping, travel, tools, apparel, technology, safety training, legal advice, claims avoidance, and much more!

Dozer Day®

The inaugural Dozer Day® was a huge success! Several hundred children and their families were able to experience the industry hands on at this very fun event.

Focusing on young kids to enter the trades is an important goal of NUCA NJ. The next generation of operators were likely making lifelong memories at Dozer Day®!
